

## Boehringer Ingelheim Award

### for Parasitological Research

---

#### Entries / Submission 2019

In 2017 Merial became part of Boehringer Ingelheim, but a long-standing institution was not changed and the yearly award for excellent parasitological research in the Benelux remains, but its name is changed into: Boehringer Ingelheim Award.

Also in 2018 this award will be presented to a researcher in the field of veterinary or medical parasitology. Candidates from the Benelux who think they might qualify for this Boehringer Ingelheim Award, and those who want to recommend a prospective candidate, are invited to write **before Monday 4 November 2019** to Prof.dr. Lodewijk Tielens. The recommendation (by email and in one single PDF file) should be accompanied with full information and documentation on research and other activities of the candidate.

---

The Boehringer Ingelheim Award will be given to researchers originating from Belgium, the Netherlands or Luxembourg (Benelux) to the appreciation and stimulation of scientific research in the field of veterinary or medical parasitology.

---

The Boehringer Ingelheim Award is a competitive prize for young researchers who have made innovative contributions to the fields of veterinary or medical parasitology. Scientists younger than 40 years of age who have completed their PhD studies, and performed additional parasitological research of outstanding quality thereafter, are eligible. Along with the certificate honouring the achievement, the winner will receive € 3000. The award is intended to encourage continued professional ambition in parasitology in the Benelux, and to reward scientific quality and active dissemination of results in (inter)national fora.

---

#### Ceremony

The prize-giving ceremony will take place in Utrecht on Thursday 28 November 2019 during the Fall Meeting of the Netherlands Society for Parasitology. Candidates should be prepared to attend this meeting in order to accept the prize personally.

---

Send proposals by e-mail (and in 1 single PDF file) to:

Prof. dr. A.G.M. Tielens  
Department Biochemistry & Cell Biology  
Faculty of Veterinary Medicine  
Utrecht University
