Brussels, April 1st, 1996.

Dear Wijnand,

Could you ask to the following invited speakers to send us quickly their abstract or, best, to bring the documents with you for our meeting on Wednesday 3 April 1996 :

- M. Van Dijk (Leiden) $\frac{1}{2}$ page (presented as in the first announcement document)
- G. Rudenko (Leiden) $\frac{1}{2}$ page "
- ✓ E. Pinelli (Utrecht) $\frac{1}{2}$ page "
- ✓ E. Schoondermark Van De Ven (Nijmegen) $\frac{1}{2}$ page "
- A. Vermeulen (Intervet. Int.) has already sent us a $\frac{1}{2}$ page abstract. However as chairman giving a main lecture, he can present a larger abstract of 1 page. Could you ask him if he accept to amplify his first abstract ?

Many thanks in advance.

Sincerely yours.

Yves Carlier.

Betreffende: Bijeenkomst parasitologen Brussel

In 1994 is de Technische Commissie 316 (Medical Devices Utilizing Tissues) van het Comité Européen de Normalisation geïnstalleerd. Deze commissie heeft mandaten gekregen om standaarden te schrijven. Deze mandaten komen voort uit de Medische hulpmiddelen Richtlijn 93/42/EEG. In deze Richtlijn is dode dierlijk weefsel opgenomen. De mandaten omvatten 4 werk-items, die over drie werkgroepen zijn verdeeld.

Wg 1; " Risk Assessment, Terminology and Global Aspects"

Wg 2; " Sourcing, Controls, Collection and Handling"

Wg 3; "Validation of the elimination and/or inactivation of viruses and other transmissible agents

Alleen in de standaard van Wg 1 zijn parasieten als risico opgenomen:

4.3 Identification of possible hazards

Careful consideration shall be given to the hazards posed by the source of animal tissue with regard to:

Potential contamination by bacteria, moulds, yeasts, parasites, viruses and/or transmissible agents and their susceptibility to elimination and/or inactivation during processing.

Veel aandacht wordt besteed in de standaarden aan de eventuele verwekkers van neurodegeneratieve ziekten zoals BSE, scrapie etc. In de standaard van Wg 2 Sourcing, etc. wordt een groot gedeelte van een normatieve annex ingeruimd voor dit probleem.

Evenwel in de plenaire vergadering hebben discussies er toe geleid om een task group for parasites in te stellen. Ze hebben mij benoemd tot convenor (Voorzitter). Engeland heeft mij twee leden toegezegd. Een daarvan heeft zijn sporen verdiend in de volksgezondheid dr LP Grime. Uit Frankrijk zijn dr T Cignon en dr B Loty toegetreden.

De Taskgroup heeft het volgende 'mandaat':

- * What are the effects of the presently accepted sterilization methods on Parasites?
- * What is the medical impact of Parasites present in medical devices for the patient and/or user?
- * How does the Global sourcing for animal tissue or their derivatives for the manufacture of medical devices effect the safety for use of these devices if the 'raw materials' are contaminated with Parasites?
- * What is the effect on the performance of products if Parasites remain in the raw material? This should be differentiated for a variety of devices.
- * Based on the knowledge gained from the investigation give advice how to proceed.
- * The advice should be translated to explore the economical impact for product and medical device manufacturers and users community.

Ik hoop dat ik maandagmiddag 13 mei 1996 enige tijd (10 a 15 minuten) krijg om het probleem te schetsen.

Met vriendelijke groet

Dr John S. du Pont

Dear Yves,

I received your fax etc. For me Wednesday morning April 3rd would fit best. I will come from a place called Hulst which is not too far from Antwerp and expect to arrive by car at about 9.00 hours except when traffic at the Ring is a problem and it might become a little later.

Best regards,

Wijnand Eling

Prof. Y. Carlier

Dr. John S. du Pont has asked whether he can give a 10/15 minutes presentation on his work in EEC on: Medical devices utilizing tissue and the risk of parasitic infection. The working group must develop standards on the use of tissue, human or animal in origin for medical purposes and the risk of transmission of parasitic diseases. He specifically asked whether there would be 15 minutes in the program on Monday May 13th in the afternoon to present the problem to the audience. Can you tell me whether this is feasable?

Best regards,

Wijnand Eling

Dear professor Carlier,

The board of the Dutch Society for Parasitology, in collaboration with and sponsored by Merck-Sharpe and Dohme has come to the installation of an award for Parasitology. Nomination for the award is open for all members of the Benelux. Rules and regulations are given in the accompanying call for nominees, which is both in French and Dutch.

It is the intention to invite nomination for this award already in 1996 and more specifically in the area of veterinary medicine.

The board of the Dutch Society cordially invites you to take place in the committee. Please, let us know whether you can accept this invitation.

Furthermore, we kindly ask you to send this call for nominees to the Belgian Parasitologists and finally we would like to ask you to indicate whether time can be made available in the Joint Meeting for the ceremony of the award. We suggest that a 15 minutes introduction and a 30 minutes survey of the research of the awardee given by the person itself might be appropriate.

Finally, I take the opportunity to ask you for a 90 minute period in the programme for the Annual Meeting of our Society.

The flyers arrived and will soon be sent to the members. There was some delay due to preparation of the papers with respect to the award.

I hope all is going well.

Yours sincerely,

Dr. W. Eling, secretary.

Beste Wijnand,

Sorry dat je niet hebt kunnen berichten, waarschijnlijk heb je een postdoc uit Spanje of India van een andere afdeling aan de hün gehad. Die kunnen waarschijnlijk mijn achternaam.

Ik begreep van Theo dat mijn proefje moet gaan over: de rol van enzymen van parasitaire oorsprong bij parasitaire infecties. In dat verband had ik gezegd de titel:

"Unique" enzymes in the energy metabolism
of parasitic helminths.

Als dat nog lukt zou het aardig zijn.
Laat je me dan t.z.t. nog weten. Op zijn minst de inhouding moet ik dan aanpassen. Maar ik wil het liever iets algemener houden dan alleen schisto.

Met vriendelijke groet,

Heddy Tielen

Dear Yves,

Unfortunately, I was out of the country when you tried to contact me by telephone, but finally I got the message and contacted your collaborator.

This is to confirm that the decision about the award has been taken. We thank you that you accepted to a member of the committee. We will come back to you as soon as we know that all the nominees have accepted their membership.

You asked whether MSD would be willing to provide more money for the support of the Meeting. They indicated that they had already supported through a belgian contribution, as well as through the award made available through the Dutch Society.

In a previous letter we asked you for a 90 minutes period in the program of the Joint Meeting for the Annual Business Meeting of the Dutch Society for Parasitology.

Maybe May 14 could be considered the best date. We might even consider that the NVP business meeting will take place during lunch time, in order not to loose time for scientific contributions. Another possibility is to plan the business meeting directly following the scientific programme and before the evening events. Please, let me know your opinion.

The flyers about the meeting have been sent tot the members. Invited speakers call me about payment for travel etc. As far as I remember we have agreed that everybody has to provide their own money for travel, accomodation and congress fee. Am I right?

Finally, there are some important research groups that feel underrepresented/absent from the program of the Joint Meeting. Is there still room for two additional papers of 15 minutes in the programme?

Yours sincerely,

Dear Wijnand,

I have received well your fax and letter of February 7, 1996, about the MSD Award for Parasitology.

It is with pleasure that I accept to take place in the Award Committe. Since we have to discuss together about the definitive programme of our Joint Meeting, I think it might be possible to incorporate the Award Ceremony in it, just limiting some other topics.

Independently of the Award, would it not be possible to ask to MSD Netherlands to sponsor our congress (We have obtained a sponsorship from MSD Belgium) ?

Please could you specify if the 90 min period you are mentioning in your fax is for a lecture/seminar ? If yes what is the previsted date ?

We are waiting for the first registrations forms to our meeting ...

Yours sincerely.

Yves Carlier.

Brussels, 6 december 1995

Dear Wijnand

Have you examined the documents related to our joint meeting?

Some colleagues want to have a meeting to discuss the congress budget.

A meeting in Brussels might be arranged in december on: friday 8 (morning or afternoon), monday 11 (only M), tuesday 12 (M or A), monday 18 (M or A), tuesday 19 (M or A) or wednesday 20 (M or A).

Please, give me quickly your best conveniences for this meeting with the objectives to discuss and to define the definitive budget, the fees and the deadlines.

Waiting the pleasure to meet you again,

Sincerely yours,

Yves Carlier

BERICHT:

Beste Winand,

allereerst de beste wensen voor 1996. Ik heb jouw briefje omtrent de bijeenkomst van de NVP en een aantal zuster-verenigingen ontvangen. Ik heb de volgende titel voor mijn voordracht: "Local and peripheral immune responses against *Haemonchus contortus*, the ovine abomasal parasite."

Zoals je misschien weet is mijn positie in Utrecht niet geheel zeker. Mocht ik niet in staat zijn om de voordracht te geven dan zal Marianne van Leeuwen of Albert Cornelissen dit waarschijnlijk wel kunnen doen.

Ik hoop je zo voldoende te hebben geïnformeerd,
met vriendelijke groet,

Henk Schallig

Indien U het genoemde aantal bladzijden niet ontvangt, of een vermindert bericht ontvangt, verzoeken wij U vriendelijk contact op te nemen via telefax nummer 030 - 2540784 of telefoon nummer 030 - 532571 (secretaresse) of 030 - 2531223 (Henk Schallig).

Dear Yves,

Meanwhile, I received an additional two proposals to change the title:

E. Schoondermark-van de Ven: Treatment of congenital Toxoplasmosis: an experimental study in monkeys.

M. Roos: Molecular biology of drug resistance in parasitic nematodes.

If possible, please change in the program accordingly.

Best wishes

Wijnand
